

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

WEF says india's agri sector can scale new highs with AI, other emerging technologies

It said the AI4AI initiative aims to transform the agriculture sector in india by promoting the use of AI and other emerging technologies

The agriculture sector in India can be transformed by promoting the use of artificial intelligence and other emerging teachnologies, according to a new world economic forum report

Agriculture is everything involved with growing plants and animals to be used for something else

Nearly everthing we eat, wear and use came form a plant or an animal raised on a farm

Farmes today are specialized, not like most portrayed in story books and farming is high tech

Agriculture is the art and science of cultivating the soil, growing crops, and raising livestock. It includes the preparation of plant and animal products for people to use and their distribution to markets

Agriculture provides most of the world's food and fabrics. Cotton, wool, and leather are all agricultural products. Agriculture also provides wood for construction and paper products.

These products, as well as the agricultural methods used, may vary from one part of the world to another

Globally, farmers report high levels of occupational stress. The purpose of this study was to identify and explore factors associated with perceived stress among Canadian farmers

Federal and state agricultural officials have sought to reassure consumers that the nation's beef supply is safe to eat

A holistic approach is needed and Behavioural change should be understood at the local level and Forming networks of farmers or working collectively can play an important role

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
